

# Emmanuel Ugwuoke

## Full-Stack Web Developer

I am an independent and passionate full-stack web developer with an obsession for good codes. I love challenges that bring me closer to helping others with my programming skills and also love collaborating with others to produce a working product. I am a perpetual learner.

Software Processes and Agile Practices (07/2020 - Present)

Issued by Coursera

## PERSONAL PROJECTS

Personal Portfolio (10/2020 - 10/2020)

- This is my personal portfolio website built with the programming skills I learnt.

Twitter Clone (06/2020 - 06/2020)

- I was able to build a twitter clone with some features
- Learnt how to use Laravel to build a web application
- Learnt how to use blade to build the front-end of a laravel application
- link to project: <https://github.com/ScribbleTons/twitty>

GymApp (09/2020 - 09/2020)

- I built this application to learn Laravel 8, Jetstream, Inertia, and Tailwindcss
- GymApp helps a gym manager to track a lead conversion to a subscriber
- Refactored my codes
- link to project: <https://github.com/ScribbleTons/GymApp>
